Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's arguments filed 10/16/06 have been fully considered but they are not persuasive. See arguments below.

I. Rejection of claims 9,17-20,23-32 under 35 USC 103(a) as being obvious over Maienfisch and The Agrochemical Handbook will be maintained in light of amendment filed 10/16/06 for reason on record and reason as follows.

Applicant argues that the Maienfisch reference is directed to the preparation of tetrahydrooxadiazines as insecticides and embraces compounds falling within the scope of the claims. Maienfisch also teaches that other actives which may be added to the preparation *may be* from the classes: organophosphorus compounds, nitrophenols and derivatives, formamidines, ureas ... and thuringiensis of which none of the classes cited would suggest / embrace abamectin. Examiner agrees that Maienfisch suggests the addition of compounds from the above classes of other actives to the composition. However, Examiner would like to point out in addition to this teaching that Mainfisch at column 17 starting at line 50 recites "the compositions according to the invention can be broadened considerably and adapted to prevailing circumstances by addition of *other insecticidal active ingredients*." Examiner would further like to point out that this teaching is broader than the teaching of the addition of the above classes of actives to Maienfisch's invention, but includes the addition of those actives as well as the addition of other actives (insecticides) not encompassed by the classes. For this reason one having ordinary skill in the art would have been motivated to add the abamectin taught by The Agrichemical Handbook to Maienfisch's composition to arrive at the instant

invention. Note both inventions (prior art and instant) are to insecticidal compositions / inventions and Mainfisch welcomes the addition of other insecticides to his invention.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
